Australasia's Number 1 in Sales Automation - SalesLink Mobile

SalesLink Mobile is the easy-to-use electronic docket book software that helps trade, delivery, and sales businesses streamline their order, invoicing and delivery processes. Using a handheld computer you can access your customer and stock information immediately whilst on the road enabling quick and efficient entry of orders and invoices.

SAVE COSTS

Never Write Another Docket Again!

Completed orders are easily transferred from your handheld computer directly into your Accounting software eliminating the need to re-punch manual orders and eliminating hard to read order books and computer entry mistakes. SalesLink Mobile is a ready-to-go solution that is simple to use and cost effective to implement. Because SalesLink Mobile seamlessly integrates to over 35 accounting systems no development or customisations are required and a solution can be up and running in a day!

SalesLink Mobile

INCREASE SALES

Simple Solutions - Real Productivity Gain

We have many small users, often only with one or two salespeople, who see a payback within 6 months of installing and running with SalesLink Mobile. Often just the reduction in not having to manually enter transactions twice (once into your docket book, then again into your accounting system) pays for the system alone. It is important for smaller business to be able to compete evenly with large corporate business for the same customer. Businesses who use SalesLink Mobile win customers!

- ROI for business with one to three salespeople is typically 6 - 9 months
- Sole Trader/One Person operations typically save 1-2 hours per day in administration

Everything you need to go Mobile in one easy Package

Sales Automation is now for everyone. We have created standard solutions including 'Lite' packages for small business and 'Pro' packages that include everything you need to become mobile, making it affordable for all business to benefit from mobile computing.
