

SalesLink MOBILE

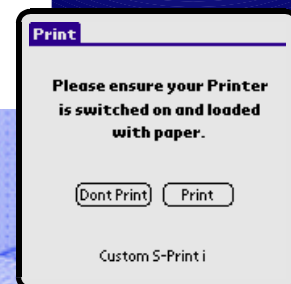

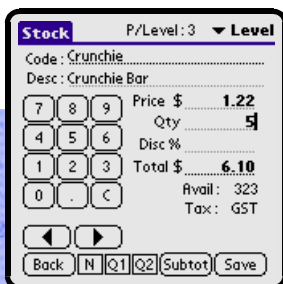

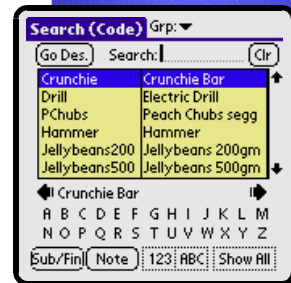

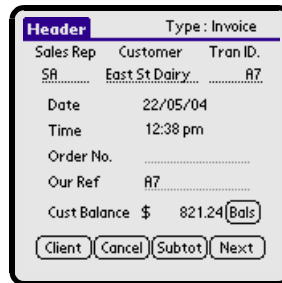

SalesLink Mobile turns a Palm handheld device into a mobile business system. By integrating with popular accounting packages, SalesLink enables you to access your data anywhere and complete a variety of tasks including Sales Entry, Stock Control, Price Checks and Customer Lookup.

SalesLink is designed to work with Palm OS Devices including Palm, Handspring, Kyocera, Meazura, Sony and Symbol handheld devices with built-in barcode scanner. All these are easy to use, inexpensive to purchase and maintain, and - so small it fits in your pocket!

SalesLink enables your sales team to enter and print orders/invoices on-the-job. Transactions can be sent electronically via modem, mobile phone (CDMA or GPRS) or via any I.P Lan connection, to update your business software.

SalesLink has many configuration options. Screen shots may differ depending upon version.
